NAVEEN KUMAR VENKATACHALAM

I have a graduation in Computer Science and Engineering and I am working in the IT Industry for the past 10 years. Initially I started my career as a Oracle Technical Developer and moved towards Functional/Business Analysis in Oracle and then in Salesforce. I have worked on 5 implementations of CRM Modules in Oracle and Salesforce across all Geographies.

Supply Chain enthuse me since the world economy revolves around supply chain and bringing blockchain to the more robust supply chain modules will help both the technolgoy and the market grow with easier access to goods across all over the world.
